Company Profile

About B1 Group W.L.L.

B1 Group W.L.L. is a Bahraini based multi-activity business entity that provides turn-key solutions to medical, business and agriculture sectors. We serve both local and regional clients in collaboration with many renowned international vendors who provide cost-effective quality products and services. B1 Group W.L.L. is a turn-key solution provider to local and regional healthcare, general trading, agriculture, construction, contracting, business consultancy, training, quality assurance, events management and IT communities, offering a wide range of quality products and services and representing many renowned international vendors in these fields. Our strong presence in other regional countries has been achieved through joint ventures with sister companies in Qatar and Kingdom of Saudi Arabia, UAE, Kuwait, Oman and Iraq in the near future.

For the healthcare providers, we provide top of the art medical equipment's for all specialties as well as different types of instruments, consumables and furniture. We also provide very unique services for medical laboratories including Clean room assessment/ validation and Design/ creation of isolation rooms. It's worth mentioning here that our experience in Dentistry is very distinguished due to the fact that we own and operate a very specialized dental laboratory considered to be the only dental laboratory in the region that manufactures transparent dental aligners using a patented technology owned by one of the partners. For the business community, we provide all types of services and products related to information/communications technology.

For the farming and agriculture community, we provide a wide range of products and services that adopt new technologies to improve food quality, boost farmer incomes and preserve water and lands such as vertical hydroponic agriculture systems used to produce all type of crops including vegetables, fruits and fodder. We are very proud of the fact that we have always been pioneers in introducing new and latest technologies from all over the world to our valued clients. In one sentence we can conclude this introduction saying that our solutions whether for medical, business or agriculture are very flexible, scalable and cost effective because we work very closely with our clients to introduce custom-made solutions that satisfy their requirements.

We very well understand the needs and requirements of the healthcare, agriculture, education and training, construction, consultancy and IT providers in the region and that helps us to work very closely with our clients in order to deliver customized solutions that fulfil the entire needs of a healthcare, agriculture, education and training, construction, consultancy and IT facilities ensuring at the same time high quality, reliability and rapid deployment of the required solutions.

Chairman Message

Inspired by the authentic Bahraini values, such as hospitality, generosity and tolerance, the staff, the management and the partners of B1 Group Specialized Products are working hard to resemble these great values that Bahrain has been know of for thousands of years.

Not only we provide services, supply products and do business but also we strive to make this experience very enjoyable, exciting and constructive to our clients because our main objective is to be distinguished and different from others. That's why everyone in B1 Group specialized products believes very firmly in the role of quality in order to achieve real customer satisfaction that leads to success, growth and prosperity.

It is needless to say that understanding the real meaning of quality is very important in business because everyone talks about quality, but in practice, this word is very elastic and hard to achieve. Quality is not something that we use to gain good reputation and fame only , but it's rather a combination of principles, values and continuous efforts to achieve and maintain excellence and distinction in everything we do making it at the end a way and a style of life.

We also believe very firmly that in order for us to grow and continue growing, we need to be very close, interactive and transparent with our valued clients and business partners. Growing can be achieved only when our clients are satisfied, loyal and pleased with our services. On the other hand, it is very important for us to understand the exact needs and requirements of our clients to be able to continuously introduce innovative and robust solutions promptly and efficiently.

Finally, I would like to admit that although there are many challenges ahead of us, we do have the guts and courage to face it as one professional team leading the way for others to follow. Our strength shall always be in diversifying our businesses to suit the market and implement effective strategies to realize and achieve our goals.

Our Mission & Vision

Our Mission:

Our mission is to expand the business horizon and cater to the Middle Eastern, Asian and African Continent markets for both Industrial and Consumer Products. Our goal is to maintain maximum levels of satisfaction for our clients by providing the finest services through our expertise in diversified fields.

Gardens Design & Landscaper

At Garden Design, we are a passionate and award-winning group of landscape designers, landscape and construction professionals enhancing nature's beauty for over 5 years. Our team of experts love what they do and it shows. Installations are well organized and completed in a timely manner. An appreciation for a variety of plant life, from traditional to exotic and native's capes creates a unique and diverse portfolio and speaks to our philosophy that no two jobs are the same.

Whether you have a small garden or large formal estate, a small commercial office space or a large corporate campus, let us transform your outdoor environment. Not only will it enhance the beauty around you, but it will increase the value of your property. At Garden Design, we believe in pursuing beauty one client at a time.

Roof Gardens

You can now grow fresh flowers or vegetables right on your building roof, you can install urban farms high and low, including on rooftops! Rooftops have great potential to grow fruits and vegetables for the bustling communities below, and in an ever-crowded world, why not utilize the abundant horizontal space right above our heads?

With gardens in such close vicinity, chefs are inspired to make seasonal dishes with their homegrown ingredients.

Wall Gardens

Create beautiful living walls, vertical gardens in your home or backyard! Woolly Pockets are easy to use and great at keeping plants healthy. There's no need to stick to the expected succulents when planting a living wall. If you create another way to hold them up, you could even plant shrubs.

Energy Projects

The goals of our Energy Solutions business align closely with the Kingdom of Bahrain Economic Vision 2030. This roadmap for transforming the Bahrain's economy clearly identifies the ambition for Manama to be the pre-eminent source of renewable energy knowledge, development and implementation and the world's benchmark for sustainable development. In line with this ambition, Energy Solutions aims to develop innovative technologies and build a platform for future young energy leaders to create a sustainable economy.

Medical Products & Services

Myobrace.com Products:

Our Partner, Myobrace System is a no-braces approach to straightening your teeth and jaws. Treatment uses myofunctional orthodontic techniques to address the poor oral habits (known as myofunctional habits) that are the real, underlying causes of crooked teeth and uses light, intermittent forces to align the teeth. Myofunctional orthodontic techniques have been practiced by Orthodontists and Dentists around the world for over 50 years.

This is done through the use of a series of removable dental appliances that are worn for just 1-2 hours each day and overnight while sleeping. Daily use of the Myobrace combined with regular activities (to improve breathing, muscle function and tongue posture) results in straighter teeth and improved function, leading to optimal facial development and a healthier smile.

Why Myobrace?

Myobrace treatment is simple and effective. It does not involve wearing braces or using complex and uncomfortable dental appliances 24 hours a day, seven days a week. Wearing a Myobrace appliance for one to two hours each day and while sleeping, combined with a few simple yet effective exercises each day is all it takes for a real change to occur, and to avoid needing braces in most cases.

- Operations planning and streamlining.
- Change Management and cost reduction exercise.
- Environmental assessment and recommendation.
- Energy Management.
- Agri-Engineering and Landscaping.

We could establish a highly specialized team to handle specific challenging requirements to meet your special needs.

Training

Medical Training

We offer a variety of medical training tailored to both medical professionals and the general medical employee in the hospitals. Our training programs can be delivered at our specialist regional training center in kingdom of Bahrain.

Our training centers have an extensive network of affiliations with internationally-recognized medical and academic centers of excellence. Additionally we are able to offer a variety of accredited courses by independent (free lancers).

We offer training to:

- Tooth Align: Our orthodontics Training courses provide attendees with skills needed to fix braces, or transparent braces to patient teeth.
- Non-Medical Personnel: Our First Aid Training courses provide attendees with sufficient skills to adequately respond and manage an initial emergency until professional healthcare arrives. Courses can be tailored to a particular environment or type of emergency situation.

Business Training

We have business development strategies and skills that make your business successful. For example: we can train you how to sell professional services is designed to help you and the professionals at your firm become the savvy business developers you know you must be to achieve selling and career success.

Our team will train you how to:

- Balance service delivery and business development time.
- Lead masterful sales conversations from the first introduction to winning the client to expanding the account.
- Keep the front end of your pipeline full while maintaining a practice of active clients.
- Ask questions to uncover the full set of client needs and desires.
- Position yourself as a trusted advisor during the sales process.
- Speed up the sales cycle and get your project to the top of the decision maker's to-do list.
- Set goals and build a personal business development plan to achieve them.

Oil and gas training courses.

Events & Conferences Management

At B1 Group we can deliver you a unique event, conference, party or branding event, whatever the style, objective or reason. Looking to have summer party, client party or corporate event. As Bahrain's based event organizers that specialize in event management and production.

We can provide you the special events that you need, such as:

- Exhibitors
- Conferences
- Workshops
- Product Launches
- Corporate Entertainment

Energy & Solar Energy

Through the latest technology in the Oil & Gas energy and many years expertise we optimize production whilst maintaining health and safety standards.

Our focus on developing new sources of energy in the Middle East region. Our Oil & Gas business includes the exploration, development and production of crude oil, natural gas and natural gas liquids, as well as natural gas storage, oil and gas processing and transport.

Our Plan for the coming 5 Years

Invest in the Medical Education

We are planning within the next 5 years to introduce new services in our company which is Medical Education. The new service will carry out a significantly expanded program of education, research, and services of education in health and medical sector. The medical education will focus on the concept of learning as it applies to all levels in the context of health.

Invest in the Private Education

Private schools have been a part of our culture and society in Bahrain since longtime. We are planning to invest in the next 5 years in this field because the demand of private education is increases rapidly in the latest 10 years in all Middle East which encouraged us to enter this venture to boost this field in the near future.

Projects Portfolio

1. BDF Hospital Air Ventilation Sterilization

We are very proud to have been selected by the Royal Medical Services (BDF Hospital) to provide sterilization to their air ventilation system. This is mainly due to the fact that we are one of the very few companies in the region that provide this sort of highly specialized services which entirely depend on the personal qualifications and skills of the performing engineer.

2. Al-Salmanyah Hospital (Did the same project above)

3. Tamkeen (Labor Fund) 40 projects accomplished

We have been working with Tamkeen for a long time and we have very strong relationship with them from the date they start empowering business in kingdom of Bahrain with their services. Tamkeen was established in August 2006 as part of Bahrain's national reform initiatives and Bahrain Economic Vision 2030, and is tasked with supporting Bahrain's private sector and positioning it as the key driver of economic development.

4. Health Tools & Equipment's distribution across most of Bahraini Hospital (Governments and Private)

B1 Group is a turn-key solution provider to local and regional healthcare community, offering a wide range of quality products and services and representing many renowned international vendors in this field. Our strong presence in gulf region has been achieved through joint ventures with local companies in all GCC countries. We very well understand the needs and requirements of the healthcare providers in the region and that helps us to work very closely with our clients in order to deliver customized solutions that fulfill the entire needs of a healthcare facility ensuring at the same time high quality, reliability and rapid deployment of the required solutions.

The major products and services provided by B1 Group can be categorized as follows:

1. Supply and installation of Medical equipment and instruments for all specialties.
2. Annual maintenance contracts for medical equipment.
3. Medical IT solutions such as health information systems, picture archiving and communication system (PACS), Laboratory information systems (LIS).
4. Medical and surgical supplies and consumables.
5. Own and operate our own Dental Laboratory.

B1 Group provides a very special range of services and products for medical laboratories including:

- Supply and installation of all types of bio-safety cabinets.
- Containment, clean air and laboratory equipment technology. This equipment is provided to control airflow (clean air, containment, bio-hazards vapours and powders), temperature (heating, cooling, and freezing) and atmospheres (CO₂, O₂, humidity).
- Clean room assessment and validation.
- Design and creation of isolation rooms.
- CAP accreditation for medical labs.
- Customized training programs for labs.
- Representation of regional and international Reference Labs.

Investment Opportunities

Rare Investment Opportunities: An Invitation to International Business Entities

Whether manufacturers, distributors, investors or any other service providers, as long as you have both the will and the courage to explore new markets, in order to diversify your investments, and maintain an annual growth rate that guarantees higher profits, we at B1 Group in partnership with you, can provide all the necessary infrastructure, logistic services and other legal requirements, in order for you to have a permanent presence in the Kingdom of Bahrain and other middle east countries , without having to invest heavily in initial business set-up, overhead expenses and cost of infrastructure. Reducing initial cost for setting-up business, and other recurrent overhead expenses, is very important for investors, especially with the current situations, such as the international economic crisis, recession and the scarcity of investment opportunities worldwide.

There are many Investment opportunities in the Kingdom of Bahrain that can suit your vision, ambition and budget. The Government of the Kingdom of Bahrain has provided many facilities and incentives for international investors due to the government's firm believe in the positive contribution of foreign investments in the GDP of the kingdom. The government also encourages and supports foreign investment in order to diversify and create other source of income beside the country's major product: OIL.

Investment in the Kingdom of Bahrain is very promising and can attract foreign investors easily due to many reasons. One of these reasons is the distinguished location of Bahrain in the center of Arabian Gulf. Other reasons being the existence of a highly efficient infrastructure, such as transport, communications and other logistic services, and the fact that Bahrain is a very advanced financial center that incubates many internationally renowned commercial and investment banks as well as locally formed competent banks therefore it can be used as the gate for Middle East to enter from.
